

Laser Manufacturing Operator

This is an exciting opportunity to join Onefive in Regensdorf, Switzerland. Onefive is part of NKT Photonics – a dynamic, international, high-tech company with facilities in Switzerland, Denmark, Germany, USA, China, and England. At our facility in Switzerland we develop and produce short-pulse lasers for a wide range of applications.

We offer a cutting edge, full-time job in a dynamic, well-educated, and international environment. As we are a fast growing company, we are looking for a motivated and talented Laser Manufacturing Operator whose contribution and commitment will have an immediate impact in our production line.

Job Summary

You will be part of our manufacturing team and work in close collaboration and interaction with Manufacturing Engineering. The work is conducted in a clean room environment and requires manual finesse, patience, and the ability to work under time pressure.

The suitable candidate's main tasks will consist of the autonomous assembly of ultrafast lasers including, but not limited to:

- Complete assembly of complex laser systems to meet customer requirements
- Laser performance testing and qualification according to our strict quality procedures
- Detailed production recording

Qualifications

- Manual work experience with high-tech components and equipment
- Technical experience in optics, photonics, or equivalent is a plus
- Familiar with a wide range of test and measurement techniques including basic electrical and optical measurements
- Experience in a clean room environment is a plus
- Experience with Quality Management systems is a plus
- Ability to follow, read, and listen to work instructions in English
- Knowledge and experience with the MS Office suite and preferably Labview (interaction)
- Self-motivated team-player
- Attention to detail and commitment to deliver high quality products

Applications and requests for additional information should be made in English and directed to careers-ch@nktphotonics.com.

NKT Photonics is the leading supplier of high performance fiber lasers and photonic crystal fibers. Our main markets are within imaging, sensing and material processing. Our products include pulsed lasers, such as supercontinuum sources, low noise fiber lasers, distributed temperature sensing systems and a wide range of specialty fibers. NKT Photonics has its headquarters in Denmark with sales and service worldwide. NKT Photonics is wholly owned by NKT A/S. More information on NKT Photonics can be found at www.nktphotonics.com
